

EXINFO-1/2/3/4T

EXINFO is high-quality tunnel guide luminaire with an aluminium body. It is well suited for use with info signs. Primary applications are tunnels and other demanding conditions, e.g. in industrial applications. EXINFO product family offers various info signs for indicating the positions of extinguishers, hoses, exit routes or emergency phones. The info sign is a standard 350 x 350 mm acrylic sign. A wall mounting bracket is available as an accessory.

Info guide luminaires improve the visibility of exit routes and safety equipment, and they are easier to locate under difficult conditions. These luminaires can be connected to an Exilight sign and emergency lighting system. Info guide luminaires use a 230 V electricity supply as standard. Luminaires offer even light distribution as well as excellent contrast and illumination. Luminaires are IP65 rated and have a viewing distance of 70 metres. In addition to tunnels, they can be used in humid and dusty environments, including car parks and industrial locations.

ADDRESSABLE LUMINAIRES

TYPE	ELECTRICAL NO. (FI)	VOLTAGE	POWER INPUT	LIGHT SOURCE	IP CLASS	RANGE	MOUNTING	BATTERY
EXINFO-1T	4129356	230 V	6 W	LED	IP65	70m	-o- 3×2,5mm ²	Central battery system
EXINFO-2T	4129357	230 V	11 W	LED	IP65	70m	-o- 3×2,5mm ²	Central battery system
EXINFO-3T	4129358	230 V	16 W	LED	IP65	70m	-o- 3×2,5mm ²	Central battery system
EXINFO-4T	4129359	230 V	21 W	LED	IP65	70m	-o- 3×2,5mm ²	Central battery system
